Is paying cash cheaper than insurance?

Cash price ÷ commercial insurers' median rate for the same service. Below 1.00× = cash is cheaper.

About the data

Source: Machine-readable standard-charge files that hospitals must publish under the CMS Hospital Price Transparency rule (45 CFR 180), all in CMS template v3.0.

Hospitals (file date):

• Aurora St. Luke's Medical Center, Milwaukee (Nov 21, 2025)
• Bellin Memorial Hospital, Green Bay (Jun 27, 2026)
• HSHS St. Vincent Hospital, Green Bay (Mar 24, 2026)
• Marshfield Medical Center, Marshfield (Feb 20, 2026)
• University Hospital (UW Health), Madison (Apr 1, 2026)

Services: The 70 CMS-specified shoppable services (CY2020 OPPS final rule, Table 3), matched by CPT code or MS-DRG.

Method:

• Facility rates only; rows with modifiers excluded.
• Payer-specific rates in dollars only (percent-of-charge rates excluded).
• 159 raw payer names grouped into 66 parent payers.
• Medians, not volume-weighted: the files say what was negotiated, not how often it's paid.

Limitations: Files are published on different dates, and hospitals label codes inconsistently (some internal codes are tagged as HCPCS and were excluded). Product line (commercial, Medicare Advantage, Medicaid) is inferred from payer and plan names.

Pipeline: Python + DuckDB: download → load → data-quality checks → SQL model → Parquet → Power BI. Code: (GitHub link added when published)
